Location & Property Context:

The subject property is municipally addressed as 11 John Street and is located on the east side of John Street, south of the intersection of John Street and Church Street, within the Ayr Urban Area.

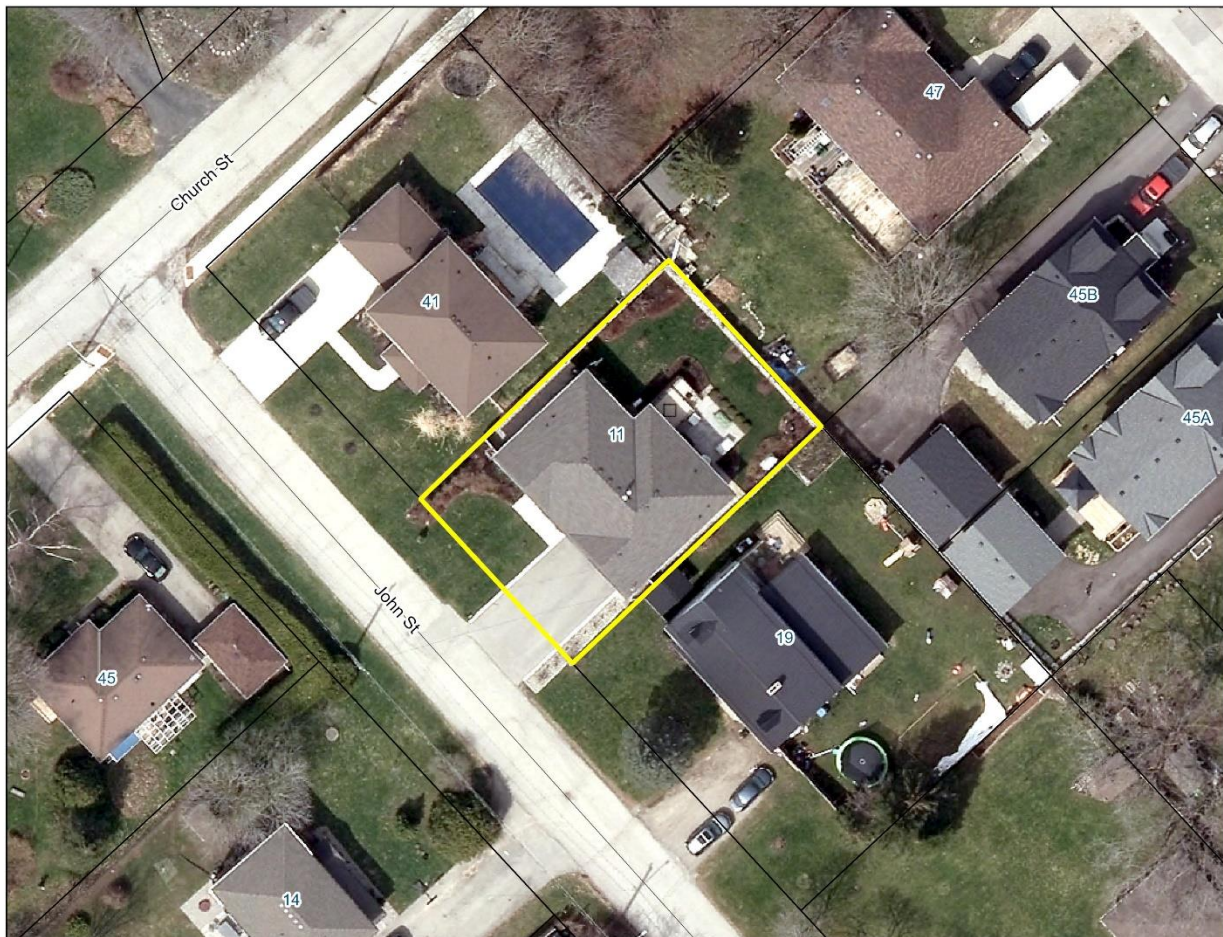

The property has an approximate lot area of 613 square metres, with an approximate lot frontage of 20.32 metres and lot depth of 30.9 metres.

The subject property is currently developed with an existing single-detached dwelling. The Owner is proposing a rear addition to the existing dwelling, with relief required from the minimum rear yard setback requirement of the Zoning By-law. Surrounding land uses are characterized by urban residential uses.

The subject property is zoned Z.4 – Urban Residential in General Zoning By-law No. 689-83.

A location map of the subject property is included below for context.

Purpose and Effect of the Planning Application:

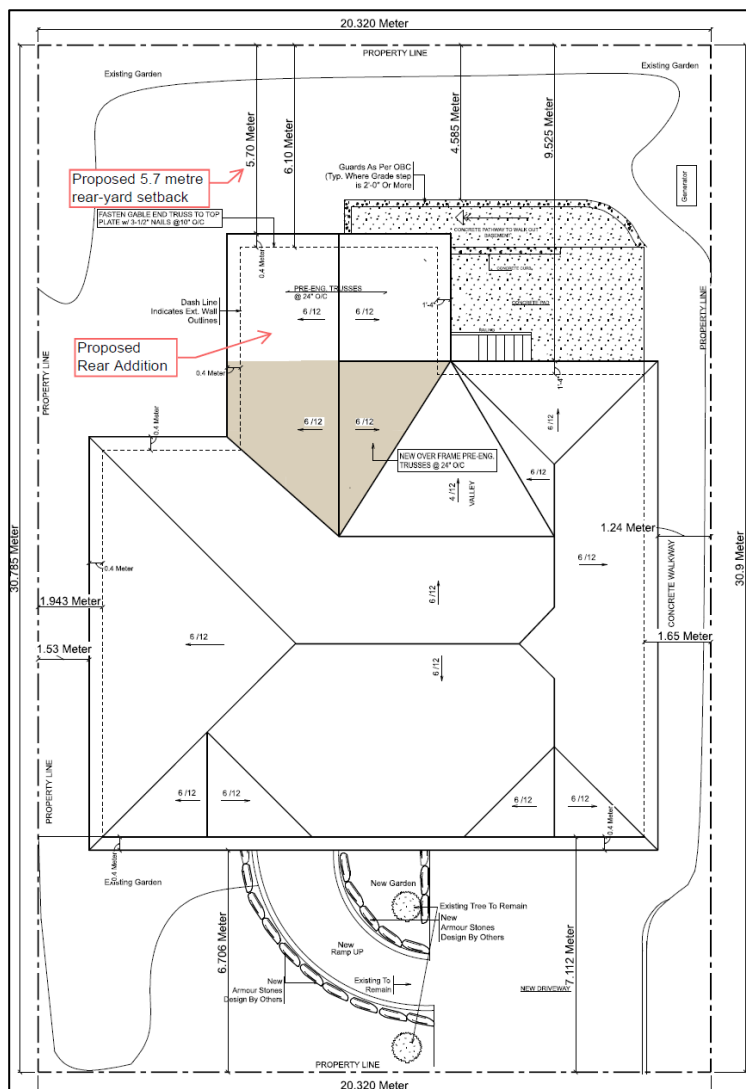

The purpose of the proposed Minor Variance Application is to facilitate a proposed addition to the existing single-detached dwelling on the subject property. As per the submitted application materials, the proposed addition would extend the existing rear living room portion of the dwelling, and would result in a proposed rear yard setback of approx. 5.7 metres. As the proposed addition does not meet the minimum rear yard setback required by the Zoning By-law, relief from the Zoning By-law is required.

The following relief is therefore being requested from General Zoning By-law No. 689-83:

1. Section 8.3.4 of the Zoning By-law requires a minimum rear yard setback of 7.5 metres for the subject property. The Owner is seeking relief from this provision to permit a reduced rear yard setback of approximately 5.7 metres, associated with a proposed addition to the existing dwelling.

A plan showing the proposed addition and rear yard setback variance is included below as Figure 2.
