Purpose and Effect of the Planning Application:

The submitted Minor Variance Application relates to an existing coach house that was established without the benefit of a building permit and forms part of a detached accessory building containing a three-car garage. Through review of the submitted materials, Planning Staff have identified that the coach house exceeds the maximum size permitted by the Township's Zoning By-law. Planning Staff have also identified that a portion of the coach house is located within the side yard of the property, whereas the Zoning By-law requires a coach house to be located within the rear yard. As such, the application seeks relief to recognize the existing size and location of the coach house and establish zoning compliance for the structure.

The following variances are requested from General Zoning By-law No. 689-83:

1. Section 6.40.7 (i) establishes that the size of a coach house shall not be greater than 40 percent of the footprint of the principal dwelling unit or 110 square metres (1,184 square feet), whichever is lesser. The owner is seeking relief from this provision to permit an existing coach house with a floor area of approximately 150.8 square metres (1,623.6 square feet), whereas a maximum floor area of 93.4 square metres (1,005 square feet) is permitted.
2. Section 6.40.9 (ii) establishes that a free-standing coach house must be located within the rear yard. The Owner seeks relief from this provision to recognize the existing location of the coach house within the side yard, whereas the Zoning By-law requires the coach house to be located within the rear yard.
