Statement Regarding LiveBarn Cameras at the North Dumfries Community Complex

North Dumfries, ON – The Township of North Dumfries is aware of questions raised regarding potential unauthorized livestreaming activity at the North Dumfries Community Complex.

The Township has received confirmation from LiveBarn, through the Ayr Rockets convenor who manages camera scheduling, that the cameras located within the facility are not actively streaming at this time and have not been since June 12, 2025.

The Township can confirm that there are no Township run summer camp programs operating on the arena floor. While there are customers who access the indoor walking track during the summer months, no day camp programming is held in the area where the cameras are installed.

In the interest of transparency and accountability, the Township is actively following up with LiveBarn to verify and ensure that no streaming has occurred without appropriate authorization and that all camera operations remain in accordance with established protocols.

The Township remains committed to protecting the privacy and safety of all facility users and will continue to monitor the situation closely.
